

Which company sells the best optical splitters

AI Overview

High-quality optical splitters are available from trusted suppliers like Thorlabs, Edmund Optics, and J-Tech Digital, covering both professional optical components and consumer-grade audio splitters.

Professional Optical Beamsplitters For scientific, industrial, or laser applications, beamsplitters are available in various types:

- Cube Beamsplitters:** Formed by two prisms glued or optically contacted, available in polarizing or non-polarizing models. They provide precise 90° reflection angles and are rugged for mounting (Thorlabs, Edmund Optics).
- Plate Beamsplitters:** Coated front surface determines splitting ratio; back surface is wedged and AR coated to reduce ghosting and interference.
- Pellicle Beamsplitters:** Ultra-thin membranes that minimize beam offset and ghosting, ideal for high-precision optical setups.
- Dichroic Beamsplitters:** Split light by wavelength, useful for combining or separating laser beams of different colors.

Suppliers:

- Thorlabs:** Offers a wide range of cube, plate, pellicle, and dichroic beamsplitters with premounted options compatible with lens tube and cage systems.
- Edmund Optics:** Provides standard, dichroic, polarizing, and non-polarizing beamsplitters with anti-reflection coatings for UV, visible, and IR ranges.
- RP Photonics:** Lists 189 suppliers and provides guidance on selecting beamsplitters based on splitting ratio, polarization, and mechanical stability.

Consumer-Grade Optical Audio Splitters For home theater or digital audio applications, Toslink/SPDIF optical splitters are widely available:

- 1x2 or 1x3 Splitters:** Allow one optical source (e.g., HDTV, Blu-Ray player) to feed multiple receivers or soundbars.
- High-Fidelity Construction:** Features include PVC outer layers, low-jitter optical fiber, and 24K gold-plated connectors for minimal signal loss.
- Supported Formats:** LPCM, Dolby Digital, DTS, and ADAT, with transmission distances up to 25...
