

Wholesale prices of cable trays in Africa

AI Overview

Cable tray prices in Africa vary by material, type, and size, typically ranging from \$20 to \$150 per 8-foot section depending on specifications.

Types and Materials

Cable trays are used to organize and support electrical cables in industrial, commercial, and residential settings. The main materials used in Africa include:

- Galvanized steel – durable and corrosion-resistant, commonly used in industrial settings
- Stainless steel – high corrosion resistance, suitable for harsh environments
- Aluminum – lightweight and easy to install, often used in commercial buildings

The main types of cable trays are:

- Ladder trays – ladder-like design with rungs for cable support
- Mesh trays – wire mesh panels for flexibility and airflow
- Ventilated trays – perforated bottom for heat dissipation
- Solid bottom trays – fully enclosed for maximum protection

Standard dimensions for trays in Kenya and other African markets are typically 8 feet (2.44 meters) in length, with heights from 50mm to 600mm and widths from 25mm to 100mm. Thickness ranges from 0.6mm to 3.0mm depending on load requirements.

Price Estimates

While prices vary by supplier, material, and size, approximate ranges are:

- Wire mesh trays: \$20–\$50 per 8-foot section
- Ladder trays (galvanized steel): \$40–\$100 per 8-foot section
- Aluminum trays: \$50–\$120 per 8-foot section
- Stainless steel trays: \$80–\$150 per 8-foot section

These prices are indicative; actual costs may differ based on local taxes, shipping, and supplier discounts.

Suppliers in Africa

- South Africa: LiteGlo and Online Electrical Store offer a wide range of cable trays with online ordering options
- Kenya: TDK Tech Store provides ladder, mesh, ventilated, and solid trays with standard sizes and thicknesses
- Zimbabwe: Electrosales lists trays but requires contacting their call center for current pricing

Recommendations

Contact suppliers directly for bulk pricing and delivery options. Specify material, type, and dimensions to get accurate quotes. Consider installation and maintenance costs, as mesh and ventilated trays reduce heat buildup and facilitate cable inspection.
